

Machine Series: **SWR**

Stretch Wrapping Robot

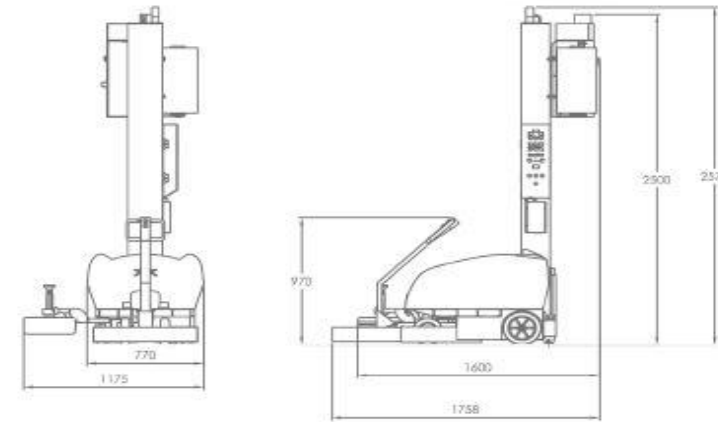

Technical Details (SW-630):

- automatic film cutting
- adjustable number of upper and lower windings
- adjustable winding tension
- password protected control panel
- height detection by light sensor
- slide fall protection

Technical Details (SWR-630 Plus):

- 7 "color touch screen with advanced wrapping function suitable for all product wrapping.
- Memory function for wrapping programs allows easy and efficient wrapping selection
- High capacity battery with over 300 pallets per charge cycle
- Easy setting of standard control panel with password
- Pre-stretching device with selectable stretch levels
- Adjustable film tension in the wrapping process
- Highest safety standard with fall protection for transportation
